NUCLEAR REGULATORY COMMISSION

Commonwealth Edison Company (LaSalle County Station, Unit Nos. 1 and 2)

[Docket Nos. 50-373, 50-374]

Exemption

I

The Commonwealth Edison Company (ComEd, the licensee), is the holder of Facility Operating License Nos. NPF-11 and NPF-18, which authorize operation of the LaSalle County Station, Units 1 and 2 (the facilities). The licenses provide, among other things, that the facilities are subject to all rules, regulations, and orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facilities consist of two boiling water reactors located at the licensee's site in LaSalle County, Illinois.

II

Section 50.54(o) of 10 CFR Part 50 requires that primary reactor containments for water-cooled power reactors meet the leakage rate test requirements in either Option A or B of Appendix J, to 10 CFR Part 50. Appendix J, Option B, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors," contains performance-based requirements, schedules, and acceptance criteria for tests of the leak tight integrity of the primary reactor containment and the systems and components which penetrate the primary containment. The Commission, in its letter dated March 11, 1996, authorized the licensee to adopt Option B of Appendix J for the LaSalle Station. Section III.B of Appendix J, Option B, requires, in part, that leak rate testing must demonstrate that the sum of the leakage rates at accident pressure (P_a) of Type B tests, and pathway leakage rates from Type C tests, is less than the performance criterion (i.e., L_a) with margin, as specified in a plant's Technical Specifications (TSs).

The version of Appendix J in effect at the operating license review stage for the LaSalle Station is now identified as Option A of Appendix J. Both Options A and B of this appendix implicitly require that the measured leakage past the inboard and outboard main steamline isolation valves (MSIVs) be included in the evaluation of the Type B and C tests. This combination of measured leakages is identified as the combined local leak rate test results.

When LaSalle was originally licensed, ComEd requested an exemption from
